

Banking on the go with FedStar CU!

You use your mobile device for texting, checking emails, playing games and ordering items online.

Why not use it for your banking as well? Our personal FedStar Mobile Banking app makes it easy to bank on the go—check your balances, make transfers, pay your bills and even transfer money to family and friends through our direct transfer program.

With our app, you can also deposit checks through Remote Deposit Capture, which is something you can't do through regular home banking. This free feature alone makes our app a must-have with those members who are on the go with busy schedules.

Members can download our free apps from Apple iTunes and Google Play Stores. Start banking at FedStar when it's most convenient for you.

Once you get registered it's easy to also add Remote Deposit Capture capabilities. Just find the green pig at the bottom of the screen and click on it. Complete the secure registration and click submit.

Once you receive the acceptance email from the credit union, you can start depositing checks remotely!

Simply download the free app from your app store:
